Profile

A **full-stack developer** with great problem-solving skills, able to adapt to any work environment.

Education

Mobile Development Cohort, at Bangkit Academy	Oct'24 – Jan'25
Bachelor of Informatics Engineering, University Mikroskil, Medan, Indonesia	Sep'22 – Aug'26
- GPA: 3.98 - Scholarship grantee on the 3rd semester	
Methodist Binjai School, Binjai Kota, Indonesia	'08 – '22

Working Experience

Fullstack Engineer, Bizapps.ID	Jun'25 – Sep'26
- Develop custom enterprise ERP systems for multiple clients using a Laravel backend API architecture and responsive React / PWA frontends, tailored to each client's specific business workflows. - Build and manage ERP modules including master data, accounting, purchasing, sales, and reporting, ensuring system scalability and reliability. - Collaborate directly with clients to gather requirements, translate business needs into technical solutions, and deliver features efficiently.	
Mobile Developer, CV. MAXIME INFINITE INTERMEDIA	Apr'24 – Jun'25
- Engineered and optimized cross-platform mobile applications using Flutter and Dart, implementing robust state management and seamless REST API integrations. - Conducted usability analysis to ensure intuitive and efficient application designs.	
Cashier Administrator & HR Manager, CV. SEHAT PLASTIK	Aug'22 – Mar'24
- Managed daily income and expenses with accuracy, improving financial reporting. - Oversaw payroll, recruitment, and training processes, enhancing team efficiency.	

Project Experience

Diet Bersama, AI Meal & Nutrition Tracker NextJS, Supabase, Gemini AI	Jun'26 – Jun'26
- Engineered a mobile-first PWA for collaborative household meal tracking, featuring AI calorie estimation via Google Gemini and automated Supabase database migrations. - Implemented WhatsApp OTP verification, scheduled reminder CRON jobs via a self-hosted messaging gateway, and Web Push notifications. - Deployed on self-hosted Ubuntu Linux with Nginx reverse proxy, SSL, and zero-downtime CI/CD via GitHub Actions.	
Self-Hosted WhatsApp Messaging Gateway Node.js, Express, PostgreSQL	Jun'26 – Jun'26

Updated at 16 September 2026

- Developed a lightweight WhatsApp messaging API using the Baileys multi-device protocol as a cost-effective replacement for commercial messaging services.

ECARD, Electronic Sharable Card | NextJS

Feb'26 – Mar'26

- Built a full-stack SaaS digital greeting platform with Next.js 15, Prisma ORM, and multi-tier interactive animated card templates.
- Integrated public wish submission streams, and a real-time analytics dashboard for user engagement tracking.

ToDo Application, DevOps Application | Kubernetes (k3s), Docker, GHA

Sep'25 – Oct'25

- Architected and deployed a containerized full-stack application onto a lightweight Kubernetes (k3s) cluster with Horizontal Pod Autoscaling (HPA) and SSL Ingress.
- Established automated CI/CD pipelines with GitHub Actions for automated Docker image building, scanning, and zero-downtime rolling deployments.

Hanierick, Income, Expense Management App | React, Flutter, and ExpressJS

Jun'25 – Jun'25

- Built a simple and intuitive income & expense tracking application focused on ease of use and clarity.
- Integrated a global chat feature allowing users to communicate and share experiences with other users worldwide.

RSURP, Human Resource Management App | Flutter

May'25 – Jun'25

- Developed a daily activity and task submission system to help employees log their work and responsibilities.
- Implemented productivity monitoring features for leaders, including charts, data visualization, and exportable reports to support performance evaluation.

Quizzy, Online Quiz Management Platform | Go, React, and Kotlin

May'25 – Jun'25

- Developed a platform to reduce administrative overhead by automating quiz management.
- Aims to boost student and teacher engagement through interactive quiz platform.

ComEx, Income and Expense Tracker | Flutter and Dart

Mar'25 - Apr'25

- Engineered an application to track user income and expenses that leverages OCR and Google Gemini to automate data entry, either from receipts or bank mutations, aims to significantly ease financial management for users.
- Utilizes Google Gemini to analyze user behavior, providing user personalized spending insights.

BisaAbsen, HRIS mobile application | Kotlin and Jetpack Compose

Nov'24 – Dec'24

- Developed an enterprise HR mobile application for PT. Amanah Karya Indonesia, streamlining daily attendance workflows.
- Designed responsive modern UI components using Jetpack Compose to elevate overall employee engagement.

EOCOUT, event organizer mobile application | Flutter and Dart

Jul'24 – Aug'24

- Built a real-time mobile communication and booking bridge between clients and event organizers using Flutter and Socket.io.

MoPay, e-wallet mobile application | ExpressJS*Jun'24 - Jul'24*

- Application to manage, store, and track balances, incomes and expenses.

Travellingo, travel mobile application | Flutter and Dart*Jun'24 – Jul'24*

- Developed a travel application to enhance and smoothen user experience in travelling.
- Simplified travel booking processes, aims to improve user engagement by about 10% to 15%
